

Information Builders is one of the largest independent software companies in the world. We work with over 12,000 customers to ensure their success by putting interactive and actionable information in the hands of everyone in the extended enterprise: employees, partners, suppliers, and customers.

Information Builders enterprise business intelligence and reporting solutions enable SOLCORP clients to address a range of critical business issues, including compliance with anti-money laundering legislation.

WebFOCUS and SOLCORP

Anti-Money Laundering Solutions for the Insurance Industry

Money laundering – which involves covertly placing funds into the financial system and then weaving a complex web of transactions to make it difficult to trace their origin – is one way for terrorist organizations to get financing. According to the International Monetary Fund, a staggering 2 to 5 percent of the world's gross domestic product is laundered in this way – totaling between \$600 billion and \$1.5 trillion annually.

The USA Patriot Act, designed to tackle the problem of terrorist financing by addressing money-laundering activities conducted through financial institutions, moves greater accountability onto an expanded number of financial institutions, now including banks, brokerage houses, and insurance companies.

SOLCORP and Information Builders have joined forces to offer a powerful anti-money laundering solution for the insurance industry. This joint solution combines Information Builders' unmatched enterprise business intelligence platform with SOLCORP's comprehensive back-office administration platform for insurance and wealth management applications. Information Builders' WebFOCUS is used to run against a data mart of transaction data to produce suspicious activity reports to alert compliance officers of potentially illicit activities. Together with the SOLCORP/INGENIUM® policy-administration application, WebFOCUS flexibly delivers reports via the Web and enables 24/7 access to all business information spanning protection, investments, risks, and distribution management.

Information Builders has implemented anti-money laundering solutions for customers around the globe, including several major banks, and brings a solid understanding of the overall anti-money laundering requirements faced by the international financial-services industry.

SOLCORP augments this knowledge with deep domain expertise in the insurance-specific implications of anti-money laundering within life and annuity product administration. Working together, SOLCORP/INGENIUM and WebFOCUS are highly complementary. The total solution is noninvasive to the INGENIUM policy administration platform, transparent to any user, and provides insurers with an effective and comprehensive means of auditing transactions and reporting on suspicious financial activity in order to meet the legislative requirements of the USA Patriot Act. Auditing can be accomplished through a traditional periodic report capture capability or through a highly proactive real-time method.
